

To promote “The Mid to Long Term Plan of Aesthetic Education –the First Phase Five-year Plan (2014 - 2018)”: With the Objective of Sowing, Piling, and Popularization of the Sense of Aesthetics.

On August 27, 2013, The Ministry of Education issued “The Ministry of Education Mid to Long Term Plan of Aesthetic Education – the First Phase Five-year-Plan (2014 - 2018)” with the aim to promote:

1. Curriculum and teaching- to cultivate students’ sense and competence of aesthetics
2. Supporting resources- to establish a supporting system for aesthetic education
3. Teachers’ intelligence- to strengthen the intelligence of educators prior to and during teaching career

All levels of schools are encouraged to conduct aesthetic education to sow, to pile, and to popularize the sense of aesthetics in order to cultivate our citizens, embellish our homeland, and to achieve a better society as a whole.

To perfectly implement the plan, to conduct constant adjustment to the plan, and to promote aesthetic education, students will be the focal object of aesthetic education. A supporting system associating the Ministry of Education with universities, local authorities, and all levels of education (K-12) for aesthetic education will be set up in the hope that resources from both the government and private sectors are integrated to promote aesthetics in life.
