

Opportunity favors the prepared mind, as a proverb says. It is also true in education and policies concerned in Taiwan. Since the year of 2009, the MOE had launched a series of policies concerning Taiwan's educational environment and future prospects with visions including holistic education, life education, lifelong education, mastery learning, and healthy campus.

Two longterm goals are emphasized by the MOE in its efforts to lead Taiwan's educational development. The first is to offer a quality educational environment to help our children grow up intelligently and happily. The second is to cultivate good civilians and boost the competitiveness of our country.

On the basis of this vision and the prospects involved, we will boost Taiwan's competitiveness through an innovative education system and learning adapted for personal needs, by nurturing talent balanced with development that is humane and technical, egoistic and altruistic, local and global. In the future we will create a mechanism for people to share their values and their

opinions about education. Through this mechanism, we will be able to gather the strengths of all the people together to contribute to sustainability in Taiwan.
